Summary

Computer Science (Informatics) graduate from Universitas Multimedia Nusantara, currently working at the Secretariat General of the Indonesian House of Representatives (DPR RI). Experienced in building internal web systems with Laravel, from backend logic to UI/UX, including financial and internal control modules. Adaptable, eager to learn, and comfortable working both independently and in cross-functional teams.

Skills

Languages: PHP, JavaScript, Python, Java, SQL, HTML

Frameworks: Laravel, React.js, Tailwind CSS

Tools: Figma, Canva, CapCut, Unity, Wix

Experience

Secretariat General of the Indonesian House of Representatives (DPR RI) **February 2026 – Present**
MKI Division — Full Stack Developer
- Develop and maintain the SK (Surat Keputusan) submission module, covering backend logic, UI/UX, and the submission workflow.
- Develop the Integrity Pact (Fakta Integritas) module to digitize the creation and management of integrity pact documents.
- Build a task management module to support work assignment and progress tracking across teams.

Secretariat General of the Indonesian House of Representatives (DPR RI) **August 2025 – January 2026**
Financial Bureau — Web Developer Intern
- Designed and developed the PPh 22 LS & UP module for DIGITall, the internal financial system, using Laravel.
- Developed PIPK Table B, Table D, and Table E modules, covering backend logic, UI/UX, and integration within the DIGITall platform.
- Redesigned the Overtime Management System and the DIGITall dashboard, improving workflow efficiency and user experience.

Tahooe Pranata Indonesia **January 2025 – July 2025**
Marketing Team — Website Designer Intern
- Designed and developed website layouts using Wix according to client requirements.
- Communicated with clients to gather feedback, discuss revisions, and deliver design solutions.
- Built responsive designs for optimal experience across devices while maintaining brand consistency and improving overall UI/UX.

Informatics Student Association (HMIF UMN) **November 2022 – November 2023**
Research and Development Division Member
- Contributed to the creation of HMIF UMN's first web application as part of the Research and Development team.
- Helped plan and run departmental events, including CSS (Computer Science Shelter) and the 2023 Company Visit to Sea Labs and BSSN.

Falitechno Mandiri **May 2021 – July 2021**
Front-End Programmer Intern
- Developed front-end sections of a hospital website that display analysis results in a structured format.

Education

Universitas Multimedia Nusantara **August 2022 – 2026**
Bachelor of Computer Science (S.Kom.) in Informatics
GPA 3.35/4.00

Tunas Media Vocational High School **July 2019 – June 2022**
Major in Software Engineering
Score 84.46/100

Certifications & Achievements
- BNSP – Junior Web Programmer
- Huawei – HCIA-AI V3 Course
- SoloLearn – Python Intermediate
- 1st Place, CodeExpo 2023 – Genshin Impact Encyclopedia Website
- 1st Place, VETA CUP 2019 – Presentation Skill Competition, Depok

Projects

DIGITall PIPK Table B, D, and E Development **September 2025 – January 2026**

- Developed core modules for the PIPK (Pengendalian Intern atas Pelaporan Keuangan) system, including Table B, Table D, and Table E.
- Designed modern, responsive UI/UX for the tables, including dynamic input forms, an evidence-upload flow, and visibility settings for each work unit.
- Implemented assignment features, assessment team (Tim Penilai) management, and real-time tracking logs to support auditability and accountability.

DIGITall Dashboard Redesign **September 2025**

- Redesigned the DIGITall dashboard with a modern card-based layout to strengthen visual hierarchy and user experience.
- Implemented responsive UI components and optimized data presentation for multiple user roles.

DIGITall Overtime System **August 2025 – September 2025**

- Redesigned the frontend of the Overtime Management System to improve usability and interface consistency.
- Integrated dynamic data retrieval from the backend for faster loading and a more intuitive workflow.

DIGITall Income Tax 22 LS & UP Module **August 2025**

- Developed a user-friendly interface for the PPh 22 LS & UP module, including table data retrieval and structured data presentation.
- Implemented backend-to-frontend data integration using Laravel for accurate and efficient tax data processing.

Phishing Link Detection **February 2025 – June 2025**

- Built a phishing URL detection system in Python as a team, applying feature extraction and comparing Naive Bayes, Decision Tree, and AdaBoost.
- Conducted model training and evaluation using accuracy metrics and dataset splitting for a machine learning course project.

Genki Preschool Academy Website **January 2025 – June 2025**

- Redesigned the company website to be mobile responsive and added education program details, branch locations, and an internal transaction system for better documentation and service.

Marvel Sport Bar Website **January 2025 – June 2025**

- Developed an official website with automated reservations, real-time stock updates, and a visual digital menu to streamline operations and improve customer experience.

Vractal Interior Website **January 2025 – June 2025**

- Created a company profile website with a material catalog, project documentation, and interactive 3D virtual tours to help clients express design preferences.

MeowTask Mobile App **February 2024 – May 2024**

- Co-designed a gamified task management app where children earn in-app currency by completing parent-assigned tasks to care for a virtual pet.
- Focused on UI/UX design and frontend implementation for a playful yet functional experience.

Apotek Sudi Bakti Project **October 2023 – December 2023**

- Handled backend and frontend tasks, database design, and a Figma prototype for a pharmacy platform that lets customers view available medications, make purchases, and consult with pharmacists.

HMIF UMN Website **November 2022 – November 2023**

- Contributed to front-end implementation and database setup for the association's web application, establishing a solid foundational structure.

Genshin Impact Encyclopedia Website **May 2023 – August 2023**

- Final project for the "Introduction to Internet" course; handled planning, API integration, and front-end development. Won 1st place at CodeExpo 2023.

POS Application for Puskesmas Parung **April 2022 – June 2022**

- Developed a Java-based Point of Sale application as a vocational school final project, streamlining transactions and generating detailed monthly reports.
